SAMPLE QUESTIONS: C_TBIT44_731

SAP Certified Development Associate - Process Integration with SAP NetWeaver 7.31

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. You are not using Integration Engine processing in your system. You are troubleshooting configuration errors with the Advanced Adapter Engine (AAE) as messages are not reaching the target system.

What is a typical sequence of checks that needs to be performed?

Please choose the correct answer.

a)	<input type="radio"/>	Receiver Determination → Interface Determination → Mapping → Technical Routing → Call Adapter
b)	<input type="radio"/>	Routing → Mapping Runtime → Connectivity
c)	<input type="radio"/>	Connectivity → Routing → Mapping Runtime
d)	<input type="radio"/>	Mapping runtime → Routing → Connectivity

2. While monitoring the customer's production system you notice that there are many messages in the Advanced Adapter Engine with the status HOLD.

Why do the messages have this status?

Please choose the correct answer.

a)	<input type="radio"/>	The receiver system is currently down for maintenance. Once the receiver system is back the messages will be delivered.
b)	<input type="radio"/>	The messages are Exactly Once in Order (EOIO) quality of service and the first message in the queue has not yet been delivered successfully.

c)	<input type="radio"/>	The messages are being sent using a communication channel that has been configured in the Availability Time Planning tool in the Runtime Workbench.
d)	<input type="radio"/>	The messages are using event-driven message processing and will be sent when the necessary event is triggered.

3. The SAP NetWeaver Process Integration single-stack installation comprises which of the following usage types?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Search and Classification (TREX)
b)	<input type="radio"/>	Application Server Java (AS Java)
c)	<input type="radio"/>	Advanced Adapter Engine Extended
d)	<input type="radio"/>	SAP NetWeaver Process Integration
e)	<input type="radio"/>	Application Server ABAP (AS ABAP)

4. An application sends messages to the Integration Server. These messages should be processed with high priority.

What configuration tasks do you have to perform to enable message prioritization?

Note: There are 3 correct answers to this question.

a)	<input type="radio"/>	Define the sender ID.
b)	<input type="radio"/>	Define the message filter.
c)	<input type="radio"/>	Set the RUNTIME/PACKAGING parameter in transaction SXMB_ADM.
d)	<input type="radio"/>	Set the „high priority“ indicator in the communication channel monitor of the Runtime Workbench.

e)	<input type="radio"/>	Register the high-priority queues.

Solutions

1 a) Incorrect	2 a) Incorrect	3 a) Incorrect	4 a) Correct
1 b) Correct	2 b) Correct	3 b) Correct	4 b) Correct
1 c) Incorrect	2 c) Incorrect	3 c) Correct	4 c) Incorrect
1 d) Incorrect	2 d) Incorrect	3 d) Incorrect	4 d) Incorrect
		3 e) Incorrect	4 e) Correct
