IDS10 - Introducing SAP S/4HANA Defense & Security

## IDS20 - Exploring Organizational Flexibility in SAP S/4HANA Defense & Security

### Notes

- This course is a training of the functionality and techniques of the defense solution. It will not provide customer specific implementation know how. It will show some best practice approaches of D&S within the used examples.
- This course (IDS20) is an essential prerequisite for the course IDS30. Especially the logistics portion of the IDS30 class requires the knowledge provided in this course and shouldn't be booked without completion of this class.
- This course is built on SAP S/4 HANA with D&S extension including native Fiori apps.
- This training does not require prior knowledge of the previous DFPS solution. For customers who have trained in the past on DFPS solution, particularly the DFPS66 training, you will find most of the concepts similar, but the usage of D&S apps is new. However, this is not a delta training DFPS->D&S as the concepts are shown anew.
