C_TSCM66_66  SAP Certified Application Associate - Logistics Execution and Warehouse Management with SAP ERP 6.0 EHP6

There are currently no events available for this course. Please feel free to register interest for this course on SAP Training. We will then notify you when a course has been scheduled.
Goals
- Identify SAP Applications and Components
- Explain basic functionality of SAP Solutions
- Attend more detailed SAP courses and have the required baseline knowledge

Audience
- All persons interested in getting an overview of SAP’s Business Suite solutions.

Essential
- Working knowledge of Microsoft office and Internet browsers

Course based on software release
- SAP ERP 6.08

Content
- SAP, a Cloud Company
- Identifying SAP Applications and Components
- Outline the Functionality of SAP Cloud-Enabling Applications
- Outlining New SAP Functionality
- Outline the usage and functionality of SAP HANA
- Outline the usage and functionality of Cloud for Customer
- Describe the various aspects of SAP User Experience
- SAP System Navigation
- Accessing the SAP System
- Personalizing the User Interface
- System-Wide Concepts
- Identifying SAP Organizational and Master Data Elements
- Logistics
- Creating a Purchase Order for Materials
- Using Supplier Relationship Management (SRM) for Procurement and Sourcing Processes
- Integrating Ariba Functionality with Procurement in SAP Enterprise Resource Planning (ERP)
- Creating a Planned Order
- Processing Production Orders
- Using Supply Chain Management (SCM) to Manage Supply and Demand
- Creating Sales Orders
- Creating a Delivery and Posting a Goods Issue
- Creating Sales Order Billing Documents
- Using Customer Relationship Management (CRM)
- Using Product Lifecycle Management (PLM)
COURSE LISTING

• Financials
• Identifying Financial Accounting Processes
• Using Financial Add-Ons for SAP Business Suite
• Creating a Journal Entry in the General Ledger
• Outlining the Outbound Payments Process in Accounts Payable
• Generating Financial Statements
• Outlining the Inbound Process in Accounts Receivable
• Outlining the Business Processes in Fixed Assets Accounting
• Analyzing Internal Costs in Management Accounting
• Monitoring Manufacturing Costs
• Analyzing Profitability
• Human Capital Management (HCM)
• Identifying the Components of SAP Enterprise Resource Planning (ERP) HCM
• Outlining the HR Renewal Functionality
• Integrating SuccessFactors in the Cloud
• Analytics and Strategic Planning
• Executing Analytics and Strategic Planning Reports
• SAP Services
• Accessing SAP Services
SCM660 - Handling Unit Management

Duration

2 days

Goals

- In this course, participants will gain an overview of the functions in Handling Unit Management
- Participants become familiar with the Customizing settings for Handling Unit Management
- Participants learn how to map procurement and distribution subprocesses using handling units within a cross-process scenario

Audience

- This course is aimed at project team members, Consultants and Partners
- The course is also suitable for customers who are still using SAP R/3.

Essential

- SCM601 Processes in Logistics Execution
- SCM510 Inventory Management and Physical Inventory

Course based on software release

- SAP ERP Central Component 6.0 (ECC) EHP7

Content

- Basics of Handling Unit Management
- Packing as the basic function of Handling Unit Management
- Procurement processes using handling units
- Distribution processes using handling units
- Quality assurance and Handling Unit Management

Notes

- Please do not enroll for this course unless you have fulfilled the prerequisites.
SCM610 - Delivery Processing in SAP ERP

Duration
3 days

Course announcements
- This course covers the customizing settings of delivery documents and the set-up of corresponding functions.

Goals
- In this course, participants use and customize functions in delivery processing

Audience
- Application Consultant

Essential
- SCM600 Processes in Sales & Distribution
- SCM601 Logistics Execution

Course based on software release
- SAP ERP 6.0 Enhancement Package 7

Content
- Idea and Function of the Delivery Document
- Explaining the Concept and Structure of the Delivery Document
- Basic Organizational Units for the Delivery Process
- Maintaining the Organizational Units for Delivery Processes
- Controlling Deliveries
- Controlling Delivery Documents
- The Goods Issue Process Based on the Delivery
- Adjusting Automatic Determination of Relevant Fields for Outbound Delivery Creation
- Adjusting Delivery and Transportation Scheduling
- Processing Outbound Deliveries
- Using the Outbound Delivery Monitor
- Processes and Functions based on the Delivery
- Picking Outbound Deliveries
- Packing Materials
- Handling Goods Issues
- Using Special Functions in Deliveries
- Further Application Areas of the Delivery Document
- Transferring Stock Between Plants
- Performing Goods Receipts Using Deliveries
- Specified Delivery Scenario
- Setting Up a Specified Delivery Scenario
Interfaces to external systems

Duration
2 days

Goals
• Explain and set up special Warehouse Management features, including storage unit management, hazardous material handling
• Set up radio frequency processes in Warehouse Management
• Describe additional functions in Warehouse Management
• Provide an overview of the warehouse control unit interface to external systems
• Provide an overview of decentralized Warehouse Management

Audience
• Project team members
• Consultants

Essential
• SCM630 Warehouse Management

Course based on software release
• SAP ERP Central Component 6.0 (ECC) EHP7

Content
• Storage unit management
• Handling Unit Management in Warehouse Management
• Hazardous materials
• Radio frequency solution in the warehouse
• Yard Management
• Cross Docking
• Value Added Service
• Dynamic Cycle Counting
• Decentralized Warehouse Management
SC601E - Processes in Logistics Execution

Goals
- Use the Logistics Execution processes in the context of SAP ERP
- Control the basic processes in Logistics Execution (goods receipt and goods issue)

Audience
- Application consultant
- Project manager

Essential
- Fundamental knowledge of the navigation within SAP applications

Course based on software release
- SAP ERP 6.0, Enhancement Package 6

Content
- Organizational units and master data in Logistics
- Mapping goods receipt and goods issue processes in SAP ERP (warehouse management, delivery processing, and transport)
- Monitoring these processes in the warehouse activity monitor
- Introduction to mobile data entry and cross docking
- Overview of Handling Unit Management
- Introduction of Task and Resource Management

Notes
- The course is also suitable for customers who are still using SAP R/3
SCM601 - Processes in Logistics Execution

Duration
3 days

Goals
• Use the Logistics Execution processes in the context of SAP ERP
• Control the basic processes in Logistics Execution (goods receipt and goods issue)

Audience
• Project managers and project team members

Essential
• A fundamental knowledge of the navigation within SAP applications

Course based on software release
• SAP ERP 6.0, Enhancement Package 7

Content
• Organizational units and master data in Logistics Execution
• Mapping goods receipt and goods issue processes in SAP ERP (warehouse management, delivery processing, and transport)
• Monitoring these processes in the warehouse activity monitor
• Introduction to mobile data entry and cross docking
• Overview of Handling Unit Management
• Introduction to Task and Resource Management

Notes
• The course is also suitable for customers who are still using SAP R/3.
Please do not enroll for this course unless you have fulfilled the prerequisites.

**Duration**
5 days

**Goals**
- Set up organizational structures in Warehouse Management
- Configure control of pick, putaway, and stock transfer activities at master data and Customizing level
- Integrate Warehouse Management into other logistics applications in SAP ERP

**Audience**
- Project team members
- Consultants

**Essential**
- SCM601 Processes in Logistics Execution

**Course based on software release**
- SAP ERP 6.0 Enhancement Package 7

**Content**
- Organizational units and master data in Warehouse Management
- Configuration of the interface between Inventory Management and Warehouse Management
- Batch management and quality management in the warehouse
- Delivery processes using Warehouse Management
- Staging components for production from the warehouse
- Configuring the warehouse activity monitor as a control instrument
- Inventory at storage bin level
- Case study: setting up a new warehouse

**Notes**
- The course is also suitable for customers who are still using SAP R/3.

Notes
- Courseware available as flipbook in Learning Hub
The certification test "Application Associate - Logistics Execution and Warehouse Management with SAP ERP 6.0 EHP6" verifies proven skills and fundamental knowledge in the area of the SAP LE/WM. It proves that the candidate has a good overall understanding within this consultant profile, and can apply this knowledge practically in projects under guidance of an experienced consultant. It is recommended as an entry-level qualification to allow consultants to get acquainted within LE/WM projects.

Notes
- As a subscriber to SAP Learning Hub you have not only access to all relevant training materials but also can benefit from so-called Learning Rooms for your exam preparation. A Learning Room is a virtual learning space that guides you through all the training related to this certification and also offers supplementary materials. Learning Rooms are led by SAP’s top instructors who help students with their learning and provide answers to their questions.
- To ensure success, SAP recommends combining education courses and hands-on experience to prepare for your certification exam as questions will test your ability to apply the knowledge you have gained in training.
- You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system).
- Some language versions may not be available at Pearson VUE. Please check the available language versions here.
