AR320 - SAP Ariba Supplier Management: Managing Supplier Information

Course announcements

- In this one-day class, students learn how to use SAP Ariba Supplier Management to manage the on-boarding of suppliers and maintain supplier data/certifications. Students perform lab exercises to experience various stages of supplier registration, including completing supplier profiles and questionnaires, scoring supplier responses, and using a supplier workspace to approve or deny supplier organizations. Students learn how a custom approval process is used to ensure only approved suppliers can be invited to participate in sourcing events or added to contracts.

Goals

- This course will prepare you to:
- Customized supplier profiles, questionnaires, and approval processes
- Various methods of supplier registration, including supplier self registration and importing from the Ariba Network
- Custom workflows to route supplier approval to stakeholders based on category, location, or custom rules
- Automated alerts when supplier documents/certifications are about to expire
- Audit logs to track changes made to responses within the supplier profile
- Questionnaire
- Advanced search tools to identify suppliers based on profile or questionnaire responses
- How to deactivate suppliers who should no longer be used

Audience

- Application Consultant
- Business Analyst
- Business Process Owner / Team Lead / Power User

- Technology Consultant
- Trainer
- User

Course based on software release

- SAP Ariba Strategic Sourcing

Content

- Introduction
- Application Orientation
- Supplier Self-Registration
- The Supplier Profile and SPQ
- Creating Suppliers
- Supplier Workspace

AR310 - SAP Ariba Supplier Management: Supplier Performance Management Projects

Course announcements

- This course covers the SAP Ariba Supplier Performance Management process and functionality. Students learn how to create and use surveys and scorecards so performance metrics can be systematically aggregated and shared with both internal users and suppliers. This course is intended for general business users who create SPM Projects. Through a combination of lecture, demonstration, and lab exercises, students learn how to create and manage Supplier Performance Management (SPM) projects, scorecards, surveys, and reports.

- Application Orientation
- Create and Edit an SPM Project
- Manage an SPM Project Planning Phase
- Manage an SPM Project Monitoring Phase
- Managing Scorecards
- Managing Surveys
- SPM Reports

Goals

- This course will prepare you to:
- Discuss the purpose of supplier performance management
- Manage an SPM project
- Manage scorecards and surveys
- Run SPM reports

Audience

- Application Consultant
- Business Analyst
- Business Process Owner / Team Lead / Power User
- Technology Consultant
- Trainer
- User

AR330 - SAP Ariba Supplier Management: Supplier Lifecycle Management

Course announcements

- In this one-day class, students will learn how to use SAP Ariba Supplier Lifecycle and Performance to enhance their organization's supplier lifecycle management. This course is intended for business users who will be managing the supplier lifecycle for their organization. Through a combination of lecture, demonstration, and exercises, students will learn how to manage supplier requests, registrations, qualifications, preferred statuses, disqualifications, and modular supplier management questionnaires. THIS COURSE ONLY COVERS SUPPLIER LIFECYCLE MANAGEMENT – IT DOES NOT COVER SUPPLIER PERFORMANCE MANAGEMENT.

Goals

- This course will prepare you to:
- Review the capabilities and benefits of the SAP Ariba Supplier Management portfolio, with emphasis on the SAP Ariba Supplier Lifecycle and Performance solution
- Use the Supplier Management dashboard to search for suppliers and monitor supplier management activities
- Employ the supplier 360° profile to view supplier information and manage supplier lifecycle processes
- Manage supplier contacts
- Request and approve a new supplier
- Initiate, participate in, and approve a new supplier registration
- Collect certificate details from a supplier using a modular questionnaire
- Start, participate in, and approve a process qualification
- Set a preferred status level for a supplier
- Change the status of a process qualification
- Recognize the features of legacy supplier qualification and supplier disqualification projects
- Review pre-packaged supplier lifecycle reports

Audience

- Application Consultant
- Business Analyst
- Business Process Owner / Team Lead / Power User
- Technology Consultant
- Trainer

- User
