## SEN300 - SAP Enable Now Training for Consultants/Implementation Partners

### Course announcements

- SAP Enable Now is a suite of tools to create, manage and deploy learning and in-app help content. This course is intended for (prospective) SAP Enable Now consultants. You will learn how to build a strong relationship with your customers and implement SAP Enable Now for both strategic and project-based use. Furthermore, you'll get the expert knowledge to deliver high-quality consulting services on time: For example, solve typical customer issues by using custom properties, scripts, and file-level customizations.

### Goals

- This course will prepare you to:
- Understand the whole picture beyond screen recording.
- Implement SAP Enable Now for both strategic and project-based use.
- Drive implementation projects on your own.
- Build a strong relationship with your customers and manage customer expectations of what is possible.
- Deliver high-quality consulting services in time: Use custom properties, Producer scripts, and change workarea files to solve typical customer issues.
- Get access to further consulting materials and SAP Enable Now support information.

- SAP Enable Now Support
- Consulting Materials
- UNITS FROM SEN200

## SEN200 - SAP Enable Now Training for Master Authors / Administrators

### Course announcements

- SAP Enable Now is an end-to-end suite to create learning and in-app help content for end users. In this course, you will learn how to work as a master author in a multi-author content production scenario.

### Goals

- This course will prepare you to:
- Customize the look and feel of your learning content by using styles, settings and sustainable templates.
- Structure your content best depending on your usage scenario. It also teaches you how to use tags, filters and multi-referencing.
- Collaborate with your authoring team, including task assignment and workflows.
- Deploy content updates, migrate, localize and publish to different platforms (for example SCORM export).
- Set up, configure the server for SAP Enable Now Manager and configure user access by creating, importing users, and assigning user roles and permissions.
