ADM750 - SAP Unicode Conversion

Duration
2 days

Goals
- Explain the differences between Non-Unicode and Unicode
- Describe the SAP Unicode implementation
- Explain the prerequisites, impact and duration of a SAP Unicode Conversion
- Plan and perform a SAP Unicode Conversion

Audience
- System Administrators
- Technical Consultants
- Project Team Members
- Project Managers

Essential
- Practical Experience in SAP NetWeaver Technology and Administration

Course based on software release
- NetWeaver 7.40

Content
- SAP Unicode Fundamentals
- SAP Unicode Sizing recommendations
- Performing the ABAP Unicode Check (UCCHECK) in the source system
- Planning and preparing the adaption of ABAP Programs and interfaces for the SAP Unicode Conversion
- Planning and preparing the technical SAP Unicode Conversion
- Performing the Unicode Pre-Conversion (SPUMG) in the source system
- Procedures and Tools for the technical OS/DB migration of the system (SWPM, R3load, SUM/DMO, Combined CU/UC)

Notes
- Important Unicode-specific aspects during the OS/DB Migration
- Performing the Unicode Post-Conversion (SUMG) in the target system
- Troubleshooting Typical Errors

- You will perform all necessary pre-conversion steps in a non-Unicode system
- You will NOT perform the technical migration (R3load Export/Import) during the training. This procedure is covered in detail in SAP course TADM70. However, you will learn which parts of the technical migration are important for a Unicode Migration.
- You will perform all necessary post-conversion steps in a Unicode system
- The special case "MDMP Conversion" is not a focus of this course, but will be covered on demand
SAPNW - SAP NetWeaver - Overview

Duration
3 days

Course announcements
- Get an overview about SAP NetWeaver and its different components.

Goals
- Familiarize yourself with the concepts of SAP NetWeaver
- Recognize the benefits for your company of using SAP NetWeaver
- Get an overview of the various components of SAP NetWeaver
- Explain how SAP HANA is integrated with SAP NetWeaver

Audience
- Data Consultant / Manager
- Database Administrator
- Developer
- Developer Consultant
- Enterprise Architect
- Help Desk / COE Support
- Program / Project Manager
- Solution Architect
- System Administrator
- System Architect
- Technology Consultant

Essential
- None

Course based on software release
- SAP NetWeaver 7.4

Content
- SAP NetWeaver Application Server (AS)
- Exploring SAP HANA
- Exploring SAP NetWeaver
- Describing the Components of SAP NetWeaver Application Server (AS)
- Developing with SAP NetWeaver AS ABAP and AS Java
- SAP Business Process Management (SAP BPM)
- Exploring SAP Process Integration (SAP PI)
- Describing the Use of Web Services as a Basis for Service-Oriented Architecture (SOA)
- Describing SAP Business Process Management (SAP BPM)
- Describing the Key Capabilities of SAP Process Orchestration (SAP PO)
- Describing the Key Capabilities of the HANA Cloud Integration (HCI)
- Describing SAP Business Rules Management (SAP BRM)
- Describing the Basics of Application Interface Framework (AIF)
- User Productivity
- Explaining SAP Enterprise Portal
- Integrating SAP Applications into the SAP Enterprise Portal
- Describing the Knowledge Management and Collaboration Functionalities of SAP Enterprise Portal
- Exploring SAP HANA Cloud Portal
- Examining SAP User New Experience
- Exploring SAP NetWeaver Mobile Platform
• Business Analytics and Information Management
• Analyzing Enterprise Data Warehouse (EDW) Persistence
• Analyzing Enterprise Data Warehouse (EDW) Data Provisioning
• Analyzing Business Intelligence (BI) with Business Objects
• Explaining SAP In-Memory Computing
• Master Data Management and Master Data Governance
• Describing SAP Master Data Governance
• Application Lifecycle Management and SAP Solution Manager
• Explaining the Challenges of Application Lifecycle Management
• Explaining the Use of SAP Solution Manager
• Using the SAP Solution Manager for System Administration
• Describing the Featureless of SAP Information Lifecycle Management (SAP ILM)
• SAP NetWeaver Security Solutions
• Describing SAP NetWeaver Security Solutions

Notes
• This course is an introductory course. It provides basic knowledge of SAP NetWeaver.
• The implementation of SAP NetWeaver and all related aspects of SAP NetWeaver PI are covered in various courses, like BIT100, BIT400, BIT430, BIT 460, TBIT44, TBIT50, and TBIT51. For more details, please refer to the BIT curriculum.
• For more information about the ABAP and Java development refer to the Development curriculum.
• For more information about the BI refer to the BI curriculum.
• For more information about the Enterprise Portal refer to the Portal (EP) curriculum.
• For more information about the Application Lifecycle Management refer to the SAP Solution Manager curriculum.
TADM55 - SAP HANA 2.0 SPS04 Installation & Administration

Duration
5 days

Course announcements
- This course covers all key capabilities of SAP HANA database system administration at a detailed level. Through the lectures and exercises you will learn how to install, update and operate an SAP HANA 2.0 SPS04 database using SAP HANA Cockpit 2.0 SP10. You install an SAP HANA 2.0 SPS03 database system and update it to SAP HANA 2.0 SPS04.
- The course covers the most important database administration tasks of an SAP HANA system administrator. During the course, you will learn details about starting and stopping, changing the configuration parameters, monitoring the database, backup and recovery and troubleshoot of a multitenant SAP HANA 2.0 SPS04 database system.

Goals
- This course will prepare you to:
  - Install and update an SAP HANA 2.0 database system
  - Installation and configuration of SAP HANA cockpit 2.0 SP10
  - Perform the SAP HANA system administration tasks using SAP HANA cockpit 2.0 SP10
  - Start and stop, change the configuration, backup and troubleshoot an SAP HANA 2.0 SPS04 system
  - Backup and recover a multitenant SAP HANA 2.0 SPS04 database
  - Succeed in certification C_TADM55A_75, SAP Certified Technology Associate – System Administration (SAP HANA as a database) with SAP NetWeaver 7.5

Notes
- The content of this course is equivalent to course HA200, except topics SAP HANA table administration, encryption, and auditing, which are not covered.
- To ensure that you retain the knowledge gained in this course and successfully complete the certification examination, we recommend that you consolidate the content in your own time after the course.

Audience
- Technology Consultant
- Database Administrator
- System Administrator
ADM315 - AS ABAP - Performance Analysis

**Duration**

3 days

**Goals**

- This course will prepare you to:
  - Explain the internal processing of user requests within AS ABAP-based SAP system
  - Find critical performance bottlenecks
  - Tune components of an SAP system

**Audience**

- System Administrator
- Technology Consultant
- Program / Project Manager

**Essential**

- SAPTEC
- ADM100
- Basic knowledge of operating systems and databases

**Course based on software release**

- SAP ECC 6.07
- AS ABAP 7.40

**Content**

- Introduction to Workload Analysis
- Recognizing the Components of a Dialog Step
- Analyzing Statistical Records and Data Information Flow
- Performance Analysis Monitors
- Monitoring System Performance
- SAP Memory Management
- Identifying the Memory Areas Used in SAP Systems
- Describing Memory Usage in SAP Systems
- Implementing SAP Extended Memory
- Hardware Capacity Verification
- Identifying Hardware Bottlenecks
- Optimizing Hardware Utilization
- Expensive SQL Statements
- Detecting Expensive SQL Statements
- Tuning Expensive SQL Statements
- SAP Table Buffering
- Describing Table Buffer Usage in SAP Systems
- Analyzing Table Buffering Performance Issues
- RFC Monitoring
- Identifying the Basics of Remote Function Calls
- Monitoring RFC Loads
Installation Planning
Installation Preparation
Managing an Enqueue Replication Server (ERS)
Optional Content: Up to Date Installation (UDI)

Notes
In this course you will learn how to practically install different SAP systems, including technical pre- and post-installation steps of the installation. As examples for the different types of SAP systems you will install an SAP HANA Database, SAP S/4HANA (using the SAP HANA DB) and an SAP Solution Manager 7.2. These SAP systems will be installed on different operating systems (Linux, Windows) using different database systems (SAP HANA and SAP MaxDB).
After successfully attending ADM110 participants should also be capable of installing SAP ECC systems (of various releases) on different operating systems and databases.
ADM800 - AS Java - Administration

Goals

- This course will prepare you to:
  - Explain the architecture of SAP NetWeaver AS Java
  - Start and stop SAP NetWeaver AS Java
  - Carry out basic configurations for SAP NetWeaver AS Java
  - Set up SSL encryption for SAP NetWeaver AS Java
  - Explain the architecture of the User Management Engine
  - Configure the User Management Engine
  - Carry out user and authorization maintenance
  - Understand and change the standard logon procedure of SAP NetWeaver AS Java
  - Maintain destinations and the JCo RFC Provider
  - Understand the architecture and the tasks of the SAP NetWeaver Development Infrastructure
  - Explain the process flow of the development process using the SAP NetWeaver Development Infrastructure
  - Specify the options for monitoring SAP NetWeaver AS Java
  - Display Monitoring and logging data using the SAP NetWeaver Administrator
  - Implement corrections for SAP NetWeaver AS Java

Audience

- Technology Consultant
- System Administrator
- System Architect
- Help Desk / COE Support

Essential

- SAPTEC
Course based on software release
- SAP NetWeaver AS Java 7.50

Content
- Fundamental Concepts of Java
- Describing the Fundamental Concepts of Java
- Describing the Architecture of the SAP NetWeaver Application Server (SAP NetWeaver AS)
- Outlining the Java Cluster Architecture
- Describing the Internal Structure of SAP NetWeaver AS for Java
- Evaluating Load Balancing Options in SAP NetWeaver AS for Java
- SAP NetWeaver AS for Java Start and Stop Procedures
- Starting and Stopping Procedures in SAP NetWeaver AS for Java
- Evaluating the Tools for Starting and Stopping an SAP System
- Operating the Java Startup and Control Framework
- Analyzing the Logs of Start and Stop Processes in SAP NetWeaver AS for Java
- Basic Configuration of SAP NetWeaver AS for Java
- Identifying the Administration Tools Used in Configuration
- Maintaining the Basic Configuration of SAP NetWeaver AS for Java with the Config Tool
- Maintaining the Basic Configuration of SAP NetWeaver AS for Java with the SAP NetWeaver Administrator
- Configuring the Properties of the Central Services Instance
- Administering the Internet Communication Manager (ICM) Process
- Infrastructure Security
- Describing Network Security
- Setting Up the Secure Sockets Layer (SSL)
• User and Authorization Administration
• Configuring the SAP User Management Engine (UME)
• Maintaining Users and Groups
• Managing Java Authorization
• Administrating Special Principles
• Configuring the Logon Procedure in SAP NetWeaver AS for Java
• Java Connectors and Destinations
• Creating Connections to Other Systems
• Creating Connections to Other Systems with J2EE Connector Architecture (JCA)
• Change Management and Software Logistics
• Structuring the Java Development Approach
• Describing the Components of SAP NetWeaver Development Infrastructure
• Developing and Releasing Java Changes with SAP NetWeaver Development Infrastructure
• Transporting Java Developments
• Monitoring
• Monitoring SAP NetWeaver AS for Java
• Connecting to a Central Monitoring System (CEN)
• Configuring the Log and Trace Files
• Outlining the Monitoring with SAP Solution Manager
Notes

- The course material is available in English only
- This course deals with the basic activities that affect SAP NetWeaver AS Java 7.50. However, no application-specific or product-specific activities are covered.
ADM325 - Software Logistics for SAP S/4HANA and SAP Business Suite

Duration
5 days

Course announcements
- If you are responsible for the software logistics at your organization – and perhaps for the SAP S/4HANA systems in the future – this course is for you.
- During this training you will learn how to set up a transport landscape matching your requirements. You will get acquainted with setting up, releasing, exporting and importing transport requests. Beyond concepts, we are placing a great amount of emphasis on the mode of operation and error handling within this course. Additionally, topics like client copy and the implementation of SAP Support Packages including required modification adjustments (SPDD/SPAU) are handled. During the course you will use diverse operating systems and databases; AS ABAP based SAP Systems, and especially SAP S/4HANA systems.

Goals
- This course will prepare you to:
  - Develop a suitable SAP system landscape with a client concept
  - Explain the methodology, concepts, and tools in SAP software logistics
  - Manage and transport Customizing and Workbench transport requests
  - Manage clients
  - Use the SAP Note Assistant, import SAP Support Packages, and explain what happens during an SAP system upgrade

Audience
- System Administrator
- Technology Consultant

Essential
- ADM100

Course based on software release
- SAP NetWeaver AS ABAP 7.52
- SAP S/4HANA Foundation 1809

Content
- Setting up the Transport Management System (TMS)
- SAP System Landscape and Client Concept
- Creating, Exporting, and Importing Transport Requests
- Customizing and Customizing Projects
- Transport Requests for Development
- Modifying SAP Objects
- Imports Using TMS
- QA Approval Procedure and Transport Proposals
- Monitoring Tools
- SAP Note Assistant, SAP Support Packages, SAP Enhancement Packages and SAP System Upgrades
- Client Tools
- Client Copy and Client Transport Tools
- Client Compare and Client Maintenance Tools
- Enhanced Change and Transport System (CTS+)

Notes
- This course is suited for SAP systems based on SAP_BASIS 7.53 and below, such as SAP S/4HANA 1809 and below, SAP ERP 6.0 Enhancement Package 8 and below.
- We recommend that you attend this course as soon as possible after the initial installation of your SAP systems.
TADM12 - Technical Implementation and Operation II for SAP S/4HANA and SAP Business Suite

Duration
10 days

Goals
- This course will prepare you to:
  - Configure the Transport Management System (TMS)
  - Understand and apply SAP software logistics (ABAP) concepts and tools
  - Explain the general idea of Application Lifecycle Management
  - Install SAP S/4HANA systems and other SAP systems like SAP Solution Manager
  - Update SAP systems using Software Update Manager (SUM)

Audience
- System Administrator
- Technology Consultant

Essential
- TADM10 Technical Implementation and Operation I for SAP S/4HANA and SAP Business Suite

Course based on software release
- Week 1:
  - SAP S/4HANA 1610
  - AS ABAP 7.51
  - SAP Solution Manager 7.2
- Week 2:
  - SAP S/4HANA 1809
  - AS ABAP 7.53
  - SAP Solution Manager 7.2

Content
- Introduction to SAP Software Logistics

Notes
- The course material is available in English only
• To ensure that you retain the knowledge gained in this course and successfully complete the certification examination at the end of the course TADM5x, we recommend that you consolidate the content in your own time after the course.

• For the certification exam "Technology Associate – System Administration SAP NetWeaver 7.5", you additionally need the knowledge of courses TADM10 and TADM5x (e.g. TADM55 with SAP HANA database).

• The certification exam is available in English only.
TADM10 - Technical Implementation and Operation I for SAP S/4HANA and SAP Business Suite

**Goals**
- Use different front-end tools to navigate in SAP systems
- Understand the significance of the SAP kernel processes
- Manage users and authorizations
- Perform the technical configuration of SAP systems
- Implement SAP Fiori
- Start/Stop and configure SAP systems
- Configure and use components for HTTP-based communication
- Work as a certified SAP Technology Consultant (additional requirements needed)

**Notes**
- The course material is available in English only
- To ensure that you retain the knowledge gained in this course and successfully complete the certification examination at the end of the course TADM5x, we recommend that you consolidate the content in your own time after the course.
- For the certification exam "Technology Associate – System Administration SAP NetWeaver 7.5", you additionally need the knowledge of courses TADM12 and TADM5x (e.g. TADM55 with SAP HANA database).
- The certification exam is available in English only

**Audience**
- System Administrator
- Technology Consultant

**Essential**
- none

**Course based on software release**
- SAP S/4HANA 1809
- ABAP Platform 1809
- AS ABAP 7.53
- SAP Solution Manager 7.2

**Content**
- Navigation
- SAP System Kernel
- Software Development
ADM103 - System Administration II for SAP S/4HANA and SAP Business Suite

Duration

4 days

Course announcements

• In class ADM100 you have gained an overview of System Administration for AS ABAP based SAP systems. The focus in that class was on classical communication using SAP GUI.
• During the transition to the latest Enhancement Package for SAP ERP or to SAP S/4HANA, HTTP based communication plays a bigger role (in particular, when you want to use SAP Fiori), however.
• During this training you will gain the administrative knowledge for the configuration of HTTP based communication. ADM103 therefore also serves as a preparation for the UX200 class. In addition, this class covers other topics such as SMTP communication and Central User Administration from an administrative point of view.

Goals

• This course will prepare you to:
  • Perform additional administrative tasks that are not dealt with in the course ADM100 (System Administration I for SAP S/4HANA and SAP Business Suite)
  • Support internet applications, external emails, and test scripts in ABAP Administration
  • Perform administrative tasks to provide help and multiple languages in SAP systems

Audience

• System Administrator
• Technology Consultant

Essential

• SAPTEC – Technology Fundamentals for SAP S/4HANA and SAP Business Suite
• ADM100 – System Administration I for SAP S/4HANA and SAP Business Suite

Course based on software release

• SAP S/4HANA 1809
• ABAP Platform 1809
• AS ABAP 7.53

Content

• Technology Components for HTTP-based Communication:
  • Internet Communication Manager (ICM)
  • Internet Communication Framework (ICF)
  • Web Services and SAP Gateway in AS ABAP
  • SAP Web Dispatcher
  • SAPconnect
  • Enqueue Replication Server
  • Central User Administration (CUA)
  • Online Documentation and SAP Help Center
  • Extended Computer Aided Test Tool (eCATT)
  • Aspects of Globalization
  • Multiple languages in one SAP system
  • Unicode

Notes

• Following on from ADM100 (System Administration I for SAP S/4HANA and SAP Business Suite), this course provides additional training on AS ABAP for SAP system administrators.
• About half of this course covers technology components for HTTP-based communication.
The goal of this course is the preparing and performing of an SAP S/4HANA conversion of an SAP ECC system from a system administrator point of view. The course is also suitable for upgrades of SAP S/4HANA Server systems, SAP ECC systems, SAP BW systems, and other AS ABAP based SAP systems.

The procedure performed in this course contains typical error situations and also modification adjustments (SPDD and SPAU).
Course announcements

- Are you responsible for the smooth operations of SAP systems? This course delivers fundamental knowledge you need to keep the system running. You will get acquainted with a broad spectrum of administrative activities for AS ABAP-based SAP Systems. After completing the course you will be prepared to carry out administrative tasks for SAP Business Suite as well as for SAP S/4HANA. As the technological platform, AS ABAP is common to both.
- During these five days you will learn to start and stop SAP stems and how to configure them, how to manage users and create backups, prepare for system maintenance - and more.
- Throughout the training you will work with administrative rights on the operative system as well as in the SAP system.

Goals

- This course will prepare you to:
  - Explain the architecture of SAP NetWeaver Application Server
  - Describe the procedure of a system logon (AS ABAP)
  - Learn about the SAP system configuration
  - Describe the architecture of database systems
  - Explain the user administration fundamentals
  - Explain the monitoring architecture and troubleshooting

Audience

- System Administrator
- System Architect

Duration

5 days

Essential

- SAPTEC
- Basic knowledge of operating systems and database

Course based on software release

- SAP S/4HANA 1809
- ABAP Platform 1809
- AS ABAP 7.53

Content

- Fundamentals
- Basic Architecture of SAP NetWeaver AS
- Process of a System Logon (AS ABAP)
- Configuring SAP Logon
- Logon Groups in AS ABAP
- Appendix - Analysis Transactions
- Starting and Stopping
- System Start Process
- Tools for Starting and Stopping SAP Systems
- System Start: AS ABAP Logs
- Introduction to System Configuration
- How the System Evaluates Its Parameters
- How Profile Parameters Are Set
- Setting Up Operation Modes
- Working with Tasklists
• Working with the Database
• Architecture of Database Systems
• Central Database Administration with the DBA Cockpit
• Outlook: Monitoring the Database
• Appendix: Fundamentals of SAP Data Archiving
• User Administration
  • User Administration Concept
  • Authorization Concept
  • Login Parameters and User Info
• Appendix: Advanced User Administration Topics
• RFC Connections
  • Fundamentals and Variants for Using RFC
  • Setting Up RFC Connections
  • Software Maintenance
• SAP Notes and SAP Support Packages
• Preparation for Software Maintenance
• Support Package Manager (SPAM) and Software Update Manager (SUM)
• Importing SAP Support Packages
• SAP Enhancement Packages
• Output Management
• Configuring Printers in AS ABAP
• The Concept of Logical Spool Servers
• Managing Spool Requests
• Printing Assistant for Landscapes
• Background Processing
• Fundamentals of Background Processing
• Time-Based Job Scheduling
• Event-Based Job Scheduling
• Background Processing: Other Topics
• Appendix: Job Management
• System Monitoring and Troubleshooting
• Monitoring Architecture
• SAP Solution Manager Monitoring - Introduction
• Traces and Logs
• Troubleshooting Procedures
SAPTEC - Technology Fundamentals for SAP S/4HANA and SAP Business Suite

Duration
4 days

Course announcements
- Would you like to understand how SAP systems function?
- During this course you will not only get acquainted with the technology fundamentals of most SAP applications (incl. SAP Business Suite and SAP S/4HANA), and how SAP systems function but also learn about different user interfaces, such as SAP Fiori or SAP GUI. The training contains hands on exercises, you will work with – among others - an SAP S/4HANA system and other SAP applications. With the newly acquired knowledge in technology you have now a stable base to further develop into a versatile range of business roles from SAP System administrator through developer to user interface expert to project - or program - manager.

Goals
- This course will prepare you to:
- Present in detail the architecture of SAP NetWeaver Application Server (SAP NetWeaver AS). The SAP NetWeaver AS is the central component of SAP S/4HANA, the SAP Business Suite and the SAP NetWeaver application platform
- Learn effective techniques for navigating
- Receive an overview of the development process in an SAP system landscape

Audience
- System Administrator
- Technology Consultant
- System Architect
- Database Administrator
- Help Desk / COE Support

- Program / Project Manager

Essential
- Knowledge of Information Technology

Course based on software release
- SAP NetWeaver AS ABAP 7.52
- SAP S/4HANA Foundation 1809

Content
- SAP Systems
- Explaining the Architecture of an SAP System, Application Server (AS) ABAP and Application Server (AS) Java
- Navigation
- Navigation using SAP Graphical User Interface (SAP GUI)
- Navigation using a Browser
- Navigation using the SAP Business Client
- Navigation using SAP Fiori
- System Core
- Explaining the Processes of an AS ABAP and AS Java based SAP System
- Processing User Requests in AS ABAP
- Software Development in SAP Systems
- Explaining the Data Structure of an AS ABAP System
- Developing and Transporting Applications
- Communication and Integration Technologies
- Describing Communication with Remote Function Call-Based (RFC) Technology
- Describing Communication with OData via SAP Gateway
• Application Lifecycle Management (ALM)
• Explaining Application Lifecycle Management (ALM)
• Describing the Installation of an SAP System
• Describing the Maintenance of an SAP System
• SAP Portfolio Overview

Notes
• SAPTEC examines SAP NetWeaver Application Server and imparts the knowledge that is required for subsequent courses related to the technology of SAP NetWeaver.
